MATRICS

Managed Anti-Money Laundering & Transaction Monitoring Solution

A risk-based, fully-featured AML and Anti-Fraud platform for financial institutions

Novaji Introserve Ltd. | www.novajii.com

WHO WE ARE

About Novaji Introserve Ltd.

- **Technology & innovation.** A technology and innovation company driven by a young, innovative and energetic team.
- **Licensed by the NCC.** Licensed by the Nigerian Communications Commission as a Value-Added Service (VAS) provider.
- **Registered with the NDPC.** Registered with the Nigeria Data Protection Commission as a Data Controller/Processor of major importance.
- **Services & solutions.** Mobile Financial Services, Enterprise Solutions, FinTech Solutions and Systems Integration.
- **Experienced leadership.** Led by a Board of Directors with over two decades of combined experience in management, telecoms, finance, IT and customer relations.

BACKGROUND

The Problem Banks Face Today

What keeps Bank CEOs, CCOs and CROs awake at night

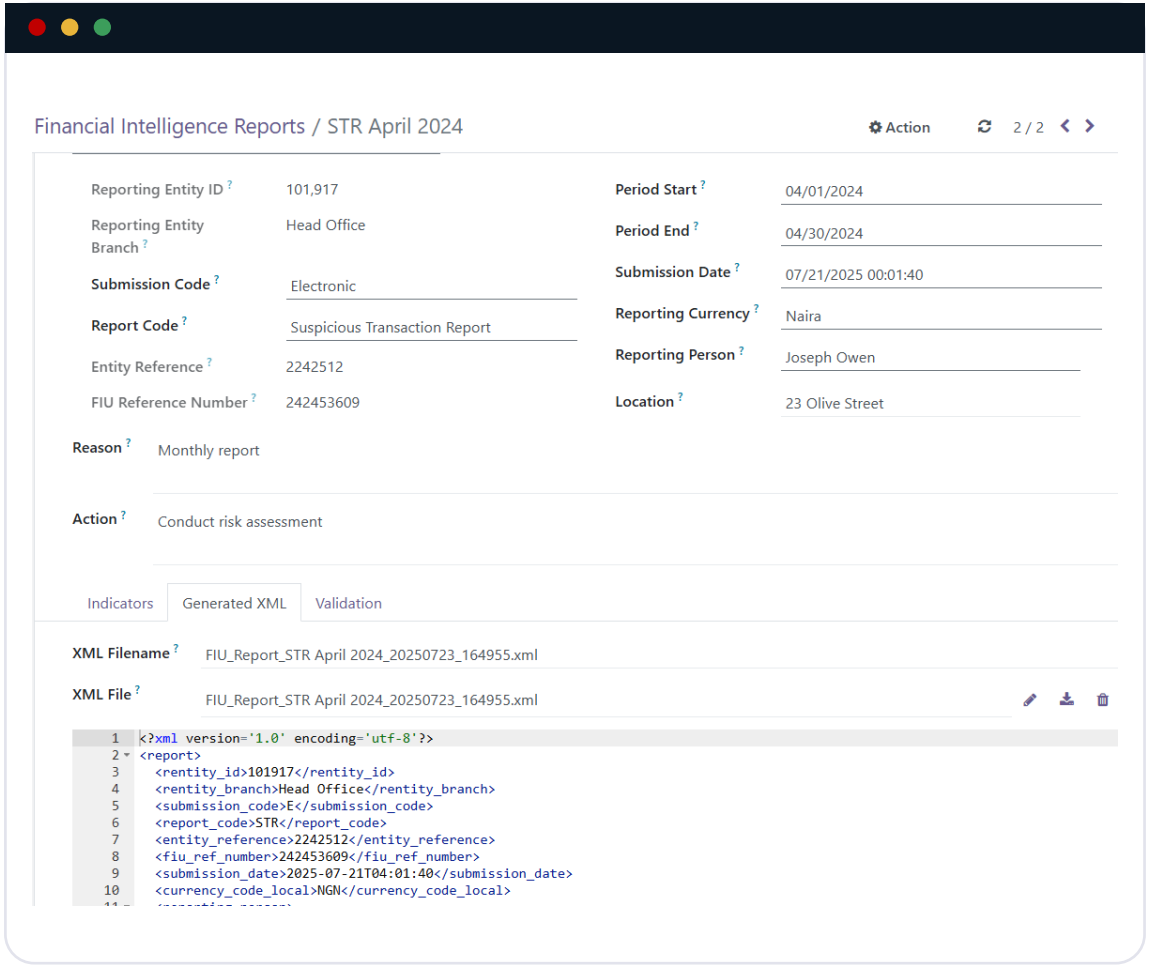

- **Regulatory pace.** Frequent promulgation of laws, standards and regulatory directives — moving as fast as technology adoption.
- **Rising complexity.** Rapid increase in the volume, velocity and complexity of transactions.
- **New risk typologies.** New typologies emerge constantly as criminals find ways to beat existing systems.
- **Workforce mobility.** Technology-induced mobility of labour demands management constantly evolve and do more with less.
- **Heightened scrutiny.** Increased regulatory and supervisory surveillance, with steep fines and penalties for breaches.

A Comprehensive, Fully-Featured Automated AML Solution

Compliant with regulatory baseline standards

- **End-to-end AML coverage.** From onboarding and screening to monitoring, case management and regulatory reporting.
- **Regulatory baseline aligned.** Built to meet the CBN's Baseline Standards for Automated AML Solutions.
- **Built for Nigerian banks.** Purpose-built for the realities of Nigerian financial institutions.

OUR APPROACH

A Risk-Based Approach to Staying Compliant

- **FATF Recommendation 1.** Developed based on Recommendation 1 of the FATF 40.
- **CBN & FATF aligned.** Compliant with CBN and FATF 40 recommendations.
- **Continuous improvement.** A framework for continuous improvement, integrated with existing financial systems.
- **AI & ML enhanced.** Leverages AI and ML to enhance detection accuracy and reduce false positives.
- **Global standards.** Aligned with Wolfsberg guidance on risk-based AML and sanctions screening, the Basel Committee's CDD guidance, and ISO 37301.

THE VALUE PROPOSITION

Five Pillars of Continuous Compliance

1

Identify

Identify the risk subjects of financial operations.

2

Monitor

Monitor effortlessly and intelligently.

3

Manage

Manage exceptions pro-actively.

4

Measure

Measure compliance levels in real time.

5

Report

Provide reports as at when needed.

REGULATORY ALIGNMENT

Aligned With the CBN Regulatory Baseline Standards for AML Solutions

- ✓ Integration with Banks' Core Banking Application
- ✓ Automated KYC and Due Diligence Processing
- ✓ Regulatory Reporting
- ✓ Data Security and Protection
- ✓ Comprehensive Risk Assessment
- ✓ Risk-Based Transaction Monitoring
- ✓ Sanctions Screening and Watchlist Compliance
- ✓ Case Management
- ✓ System Scalability
- ✓ Machine Learning and AI Capabilities

PLATFORM ARCHITECTURE

A Modular, Integrated Solution

Case Manager

- Case management
- Alert manager
- Exception processes
- Automated alerts
- Analytics

Transaction Monitoring

- Policies & procedures
- Systems & inventory
- Transaction review
- Reports
- Internal reviews
- Fraud detection
- Automated alerts
- Statistical insights
- Alert groups
- Control officers
- Forex (FX), SWIFT

Compliance & Due Diligence / AML

- Rulebook
- Financial Crime Risk Assessment (FCRA)
- Risk assessment
- Due Diligence (CDD)
- Enhanced Due Diligence (EDD)
- Know Your Customer (KYC)
- Know Your Employee (KYE)
- Know Your Vendor (KYV)
- Regulatory reporting
- NFIU reporting
- Sanction screening
- Adverse media
- Training

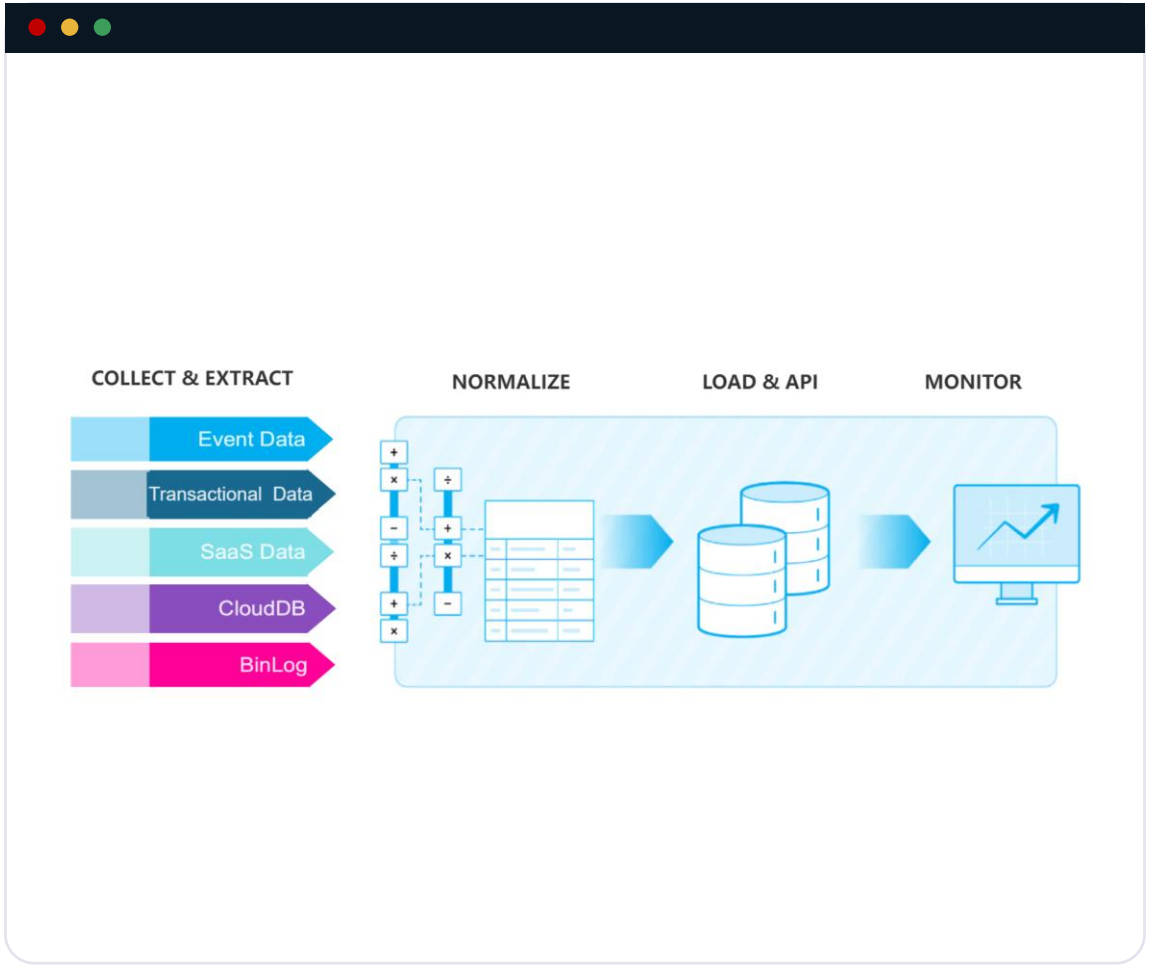

Internal Audit

- Audit universe
- Audit plan
- Audit scope
- Audit processes / testing
- Risk management
- Reports

PLATFORM CAPABILITY

High-Performance Data Integration

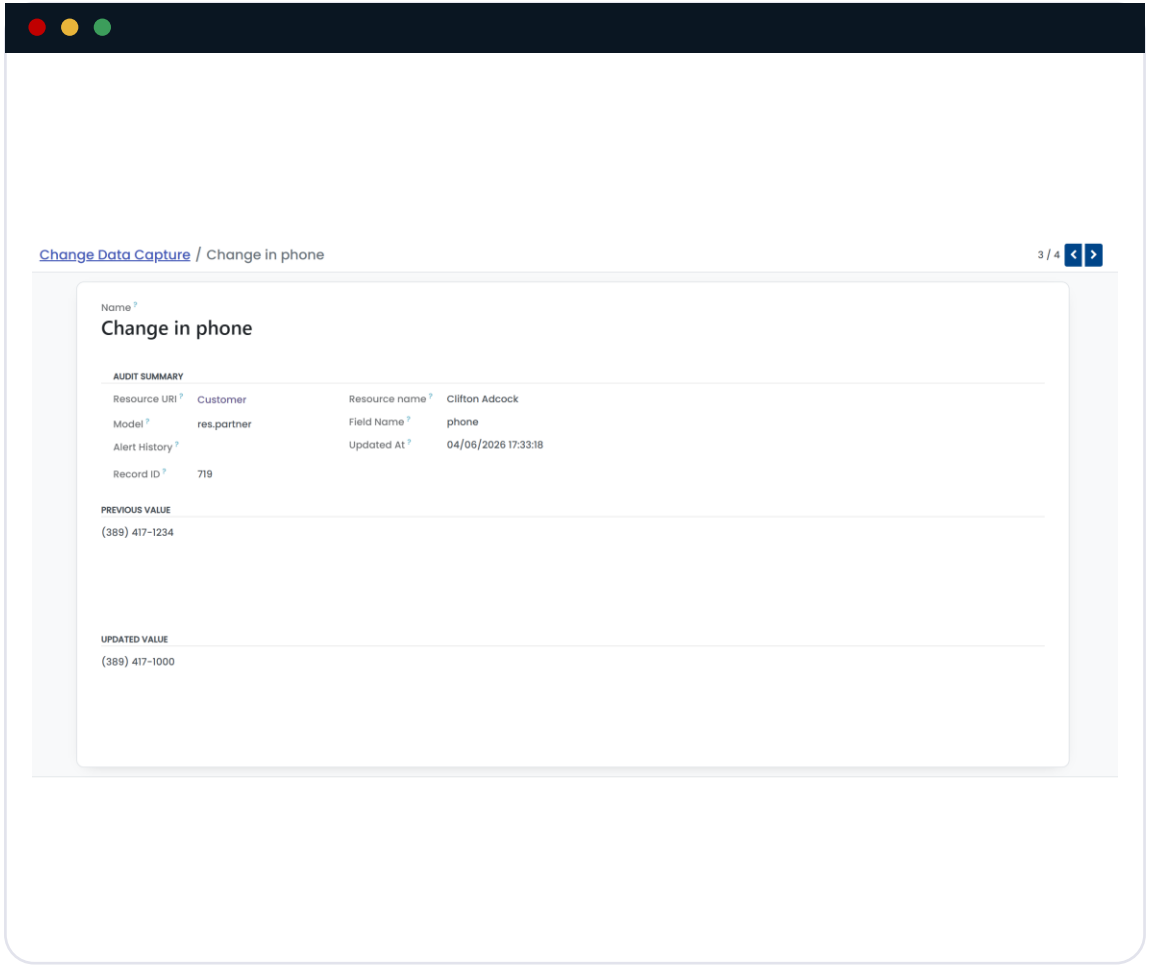

- **Real-time at scale.** Enhances real-time monitoring at speed and at scale.
- **Operational resilience.** Maintains operational resilience as data volumes grow.
- **Hundreds of sources.** Supports hundreds of data sources with fast speed and high accuracy.
- **Single source of truth.** Reduces operational complexity while maintaining a single source of truth.
- **Regulator-ready.** Addresses regulator requirements for system scalability.

PROACTIVE DETECTION

Change Data Capture — In Real Time

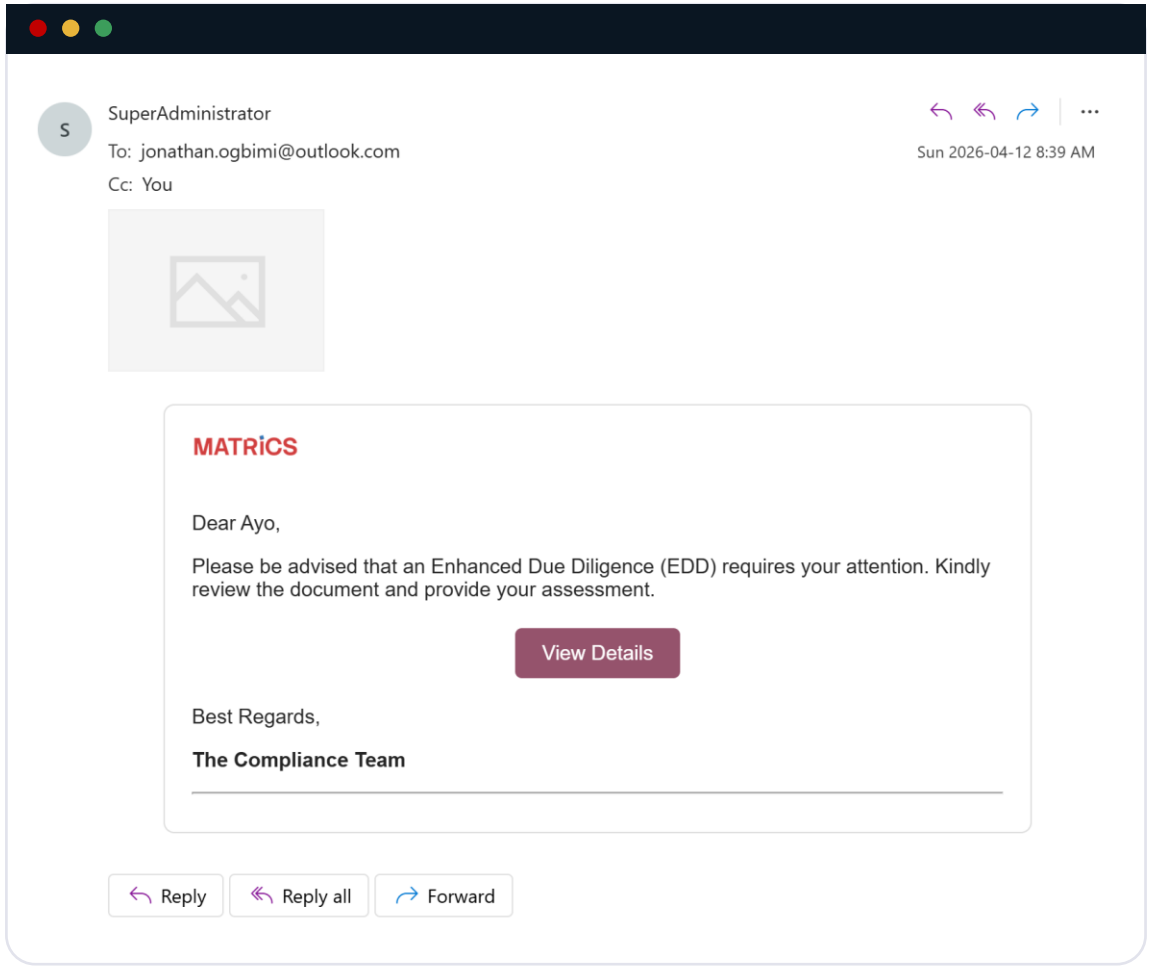

- **Fraud starts with a change.** Fraudulent activity typically begins the moment something changes.
- **Catch it before the next move.** Pro-active fraud detection means capturing change as it happens.
- **Act before the crime happens.** Take preventive, pro-active action before the real crime takes place.
- **Immediate containment.** Place accounts on PND until the reason for a change is understood.
- **Proactive Mitigation** for:
  - Account Takeover (ATO)
  - SIM Swap Fraud
  - POS and ATM Fraud
  - Insider Fraud
  - Authorized Push Payment (APP) Fraud
  - Identity Theft
  - New Account Fraud

ALWAYS WATCHING

Real-Time Alerts

- **Get ahead of fraud.** Pro-actively monitor change events that can lead to fraud — before they happen.
- **Watch sensitive transactions.** Monitor transactions that could expose the institution to risk or regulatory fines.
- **Keep everyone informed.** Keep all stakeholders in the know, in real time.

CUSTOMER RISK

Know Your Customer (KYC) & Due Diligence

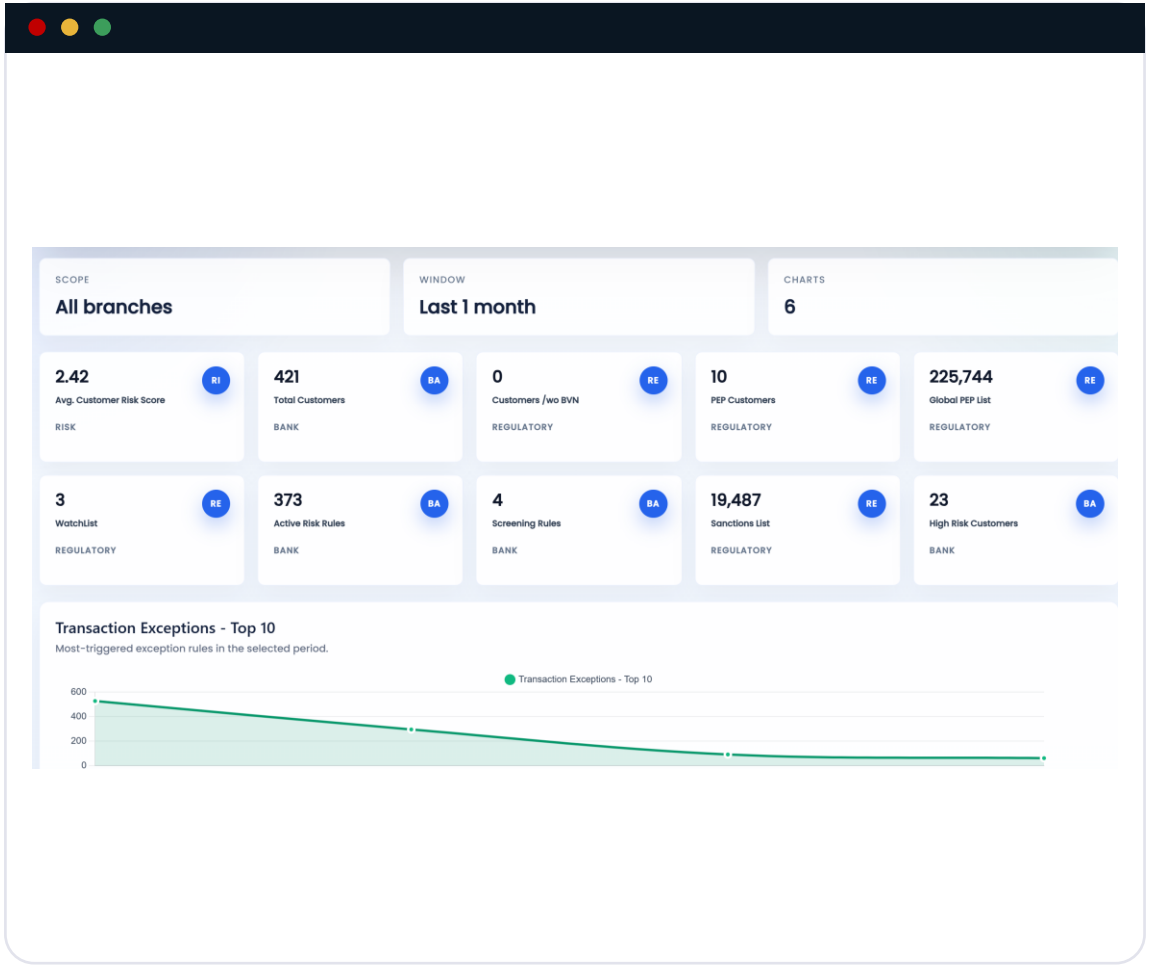

- **Verified identity.** Customer address verification and API integration for identity verification, plus Know-Your-Business checks.
- **Always current.** Continuous update of customer information — email, phone, address, BVN, NIN.
- **Exception handling.** Automated alerts on customers with missing contact details or expired ID.
- **Automated risk profiling.** Screens against Global Sanctions, PEP, Blacklist, Watchlist, Grey List and Adverse Media.

VISIBILITY

Statistical Dashboard With Key Performance Indicators

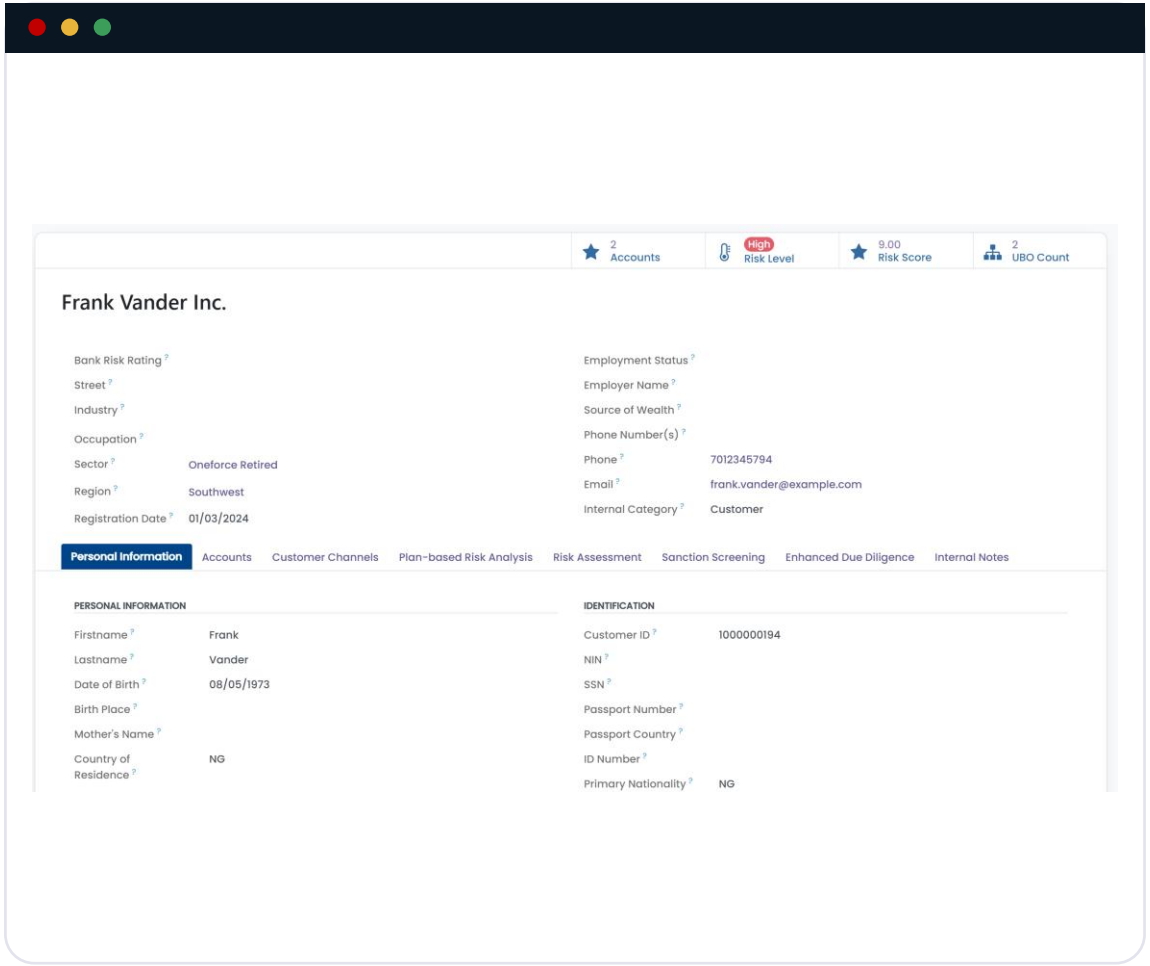

- **At a glance.** Get your overall risk position at a glance, in real time.
- **Live performance tracking.** Monitor performance continuously across the institution.
- **Management-ready KPIs.** Key performance indicators purpose-built for management reporting.
- **Full coverage.** Alert statistics, employee statistics and KYC statistics in one view.

ONBOARDING

Customer Onboarding

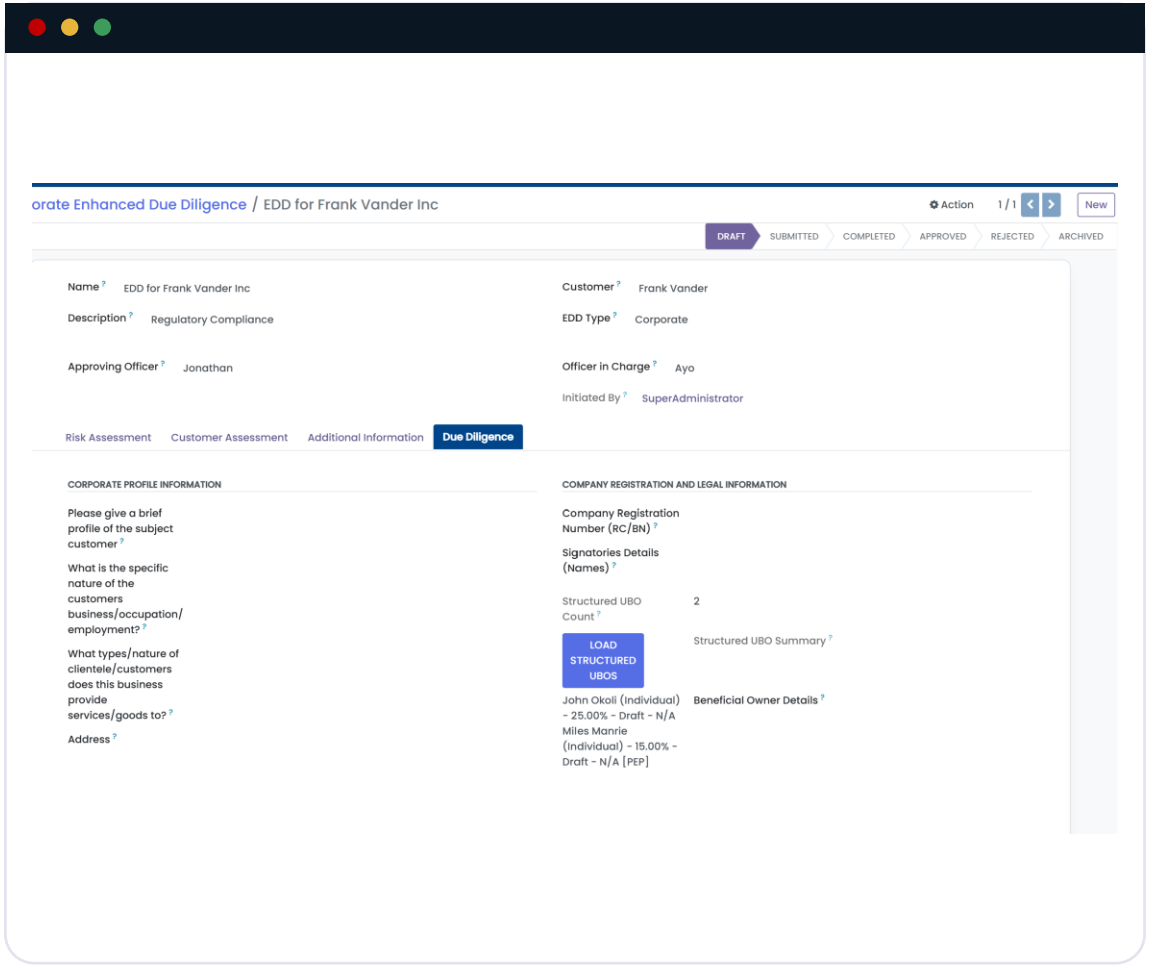

- **Risk from day one.** Run a full risk assessment at customer onboarding.
- **Assign & profile.** Assign a risk score and set the customer's risk profile automatically.
- **Instant escalation.** Trigger email alerts for compliance team review.
- **EDD recommendation.** Automatically recommend Enhanced Due Diligence where warranted.

DUE DILIGENCE

Customer Due Diligence

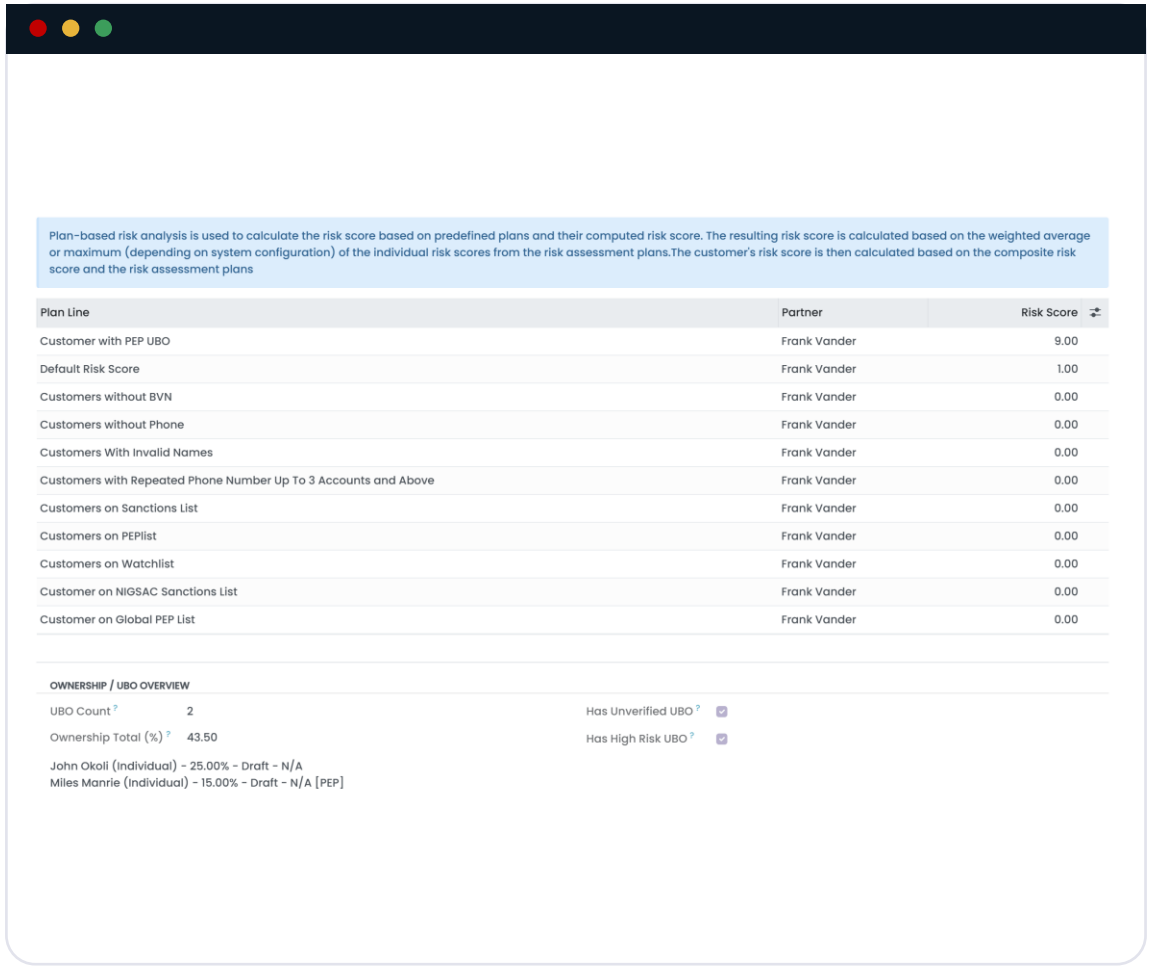

- **Automated at onboarding.** Automated customer risk profiling from the moment of onboarding.
- **Identity verification API.** RESTful API integration with identity verification providers.
- **Detailed risk assessment.** Detailed customer risk assessment with automatic or manual risk rating.
- **Screening built in.** Add customers to the sanctions list and run adverse media screening directly.

RISK RULES

Rule-Based Risk Profiling

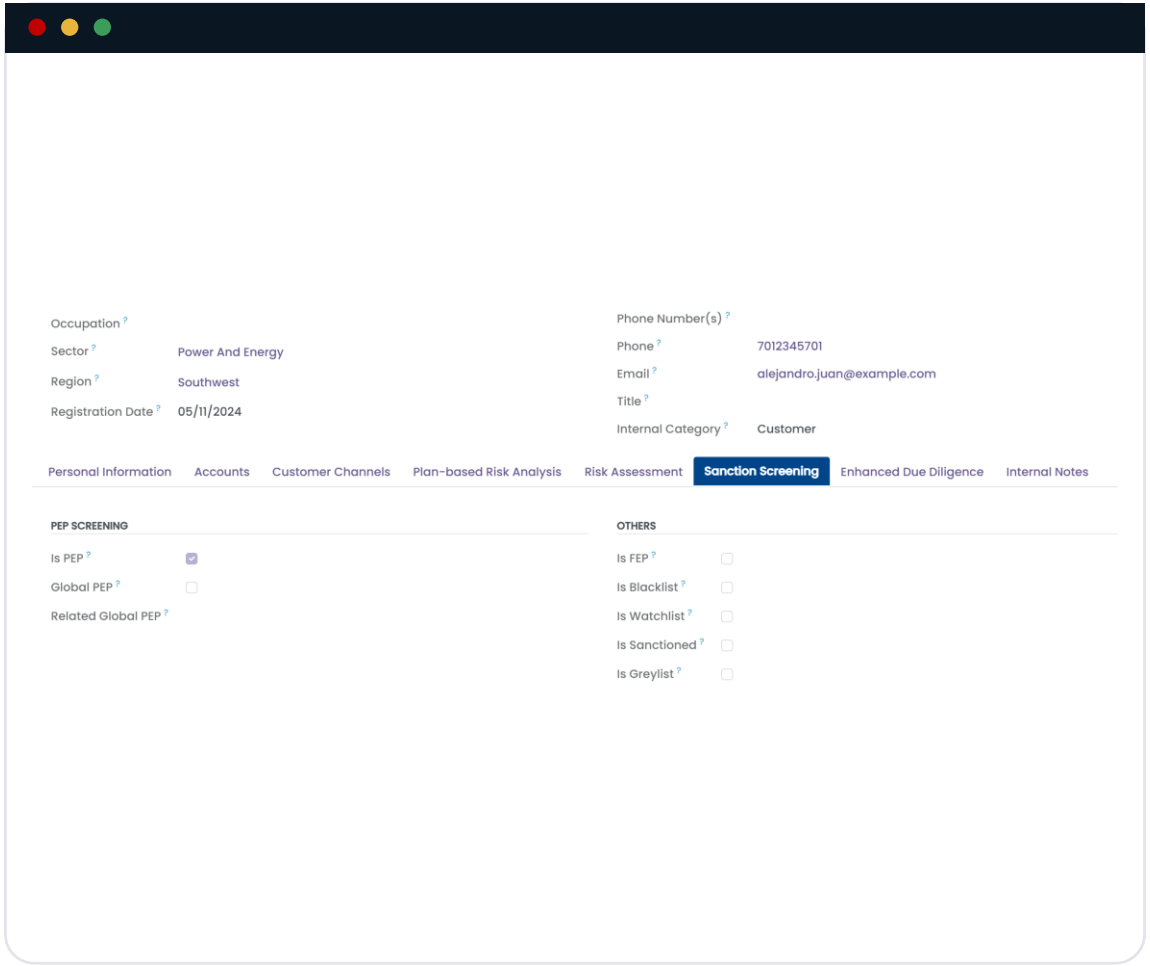

- **Define your rules.** Define risk rules that reflect your institution's risk appetite.
- **Applied at onboarding.** Rules are applied automatically at customer onboarding.
- **Real-time capture.** Risk is captured in real time as customer data changes.
- **Corporate ownership.** Ultimate Beneficial Owner (UBO) identification for corporate accounts.

SCREENING

Screen Customers Against Sanctions & PEP Lists

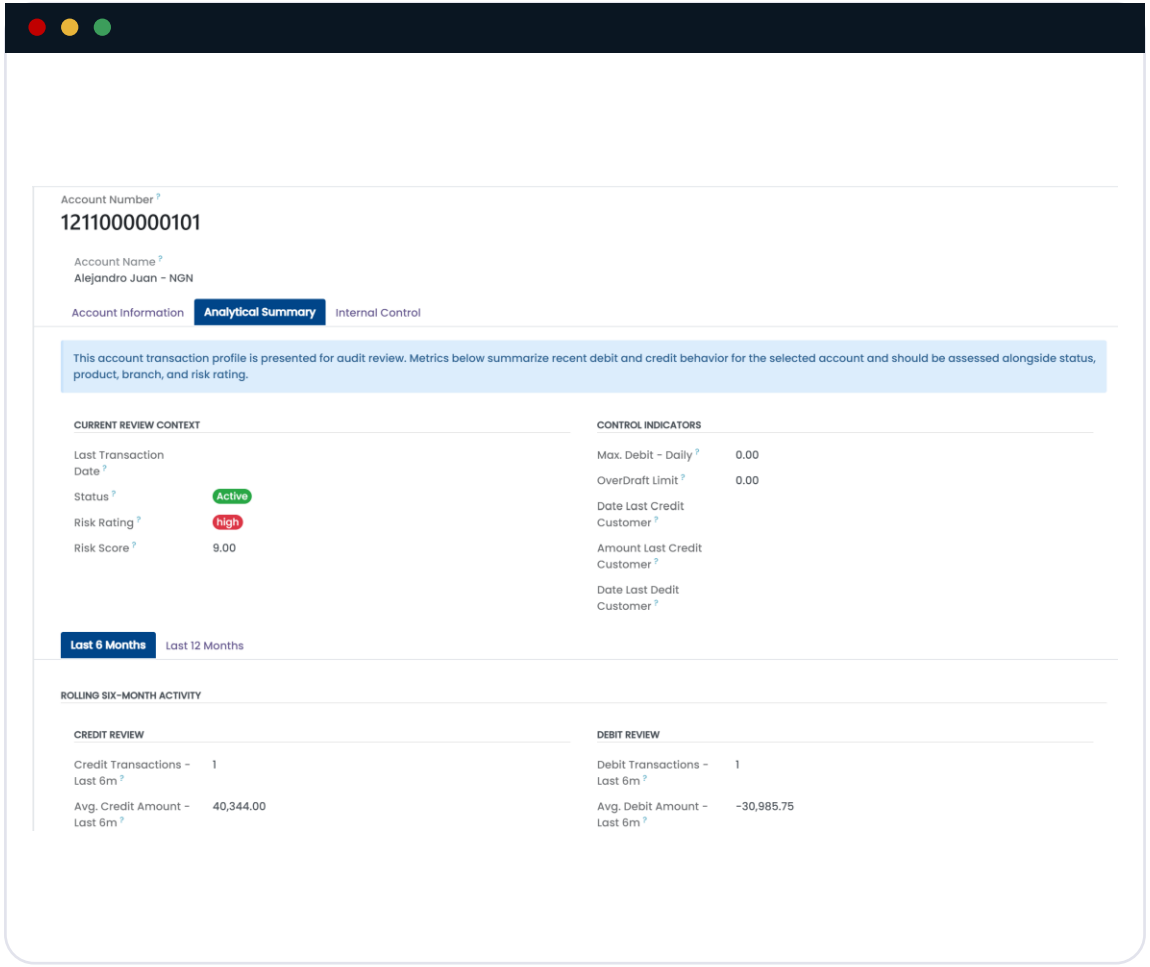

- **Local & global PEP.** Automatically screen customers against local and global PEP lists at onboarding.
- **Always current.** Maintain a regularly updated sanctions list from multiple sources.
- **Every branch, every time.** Consistent screening across all branches and locations.

ACCOUNT RISK

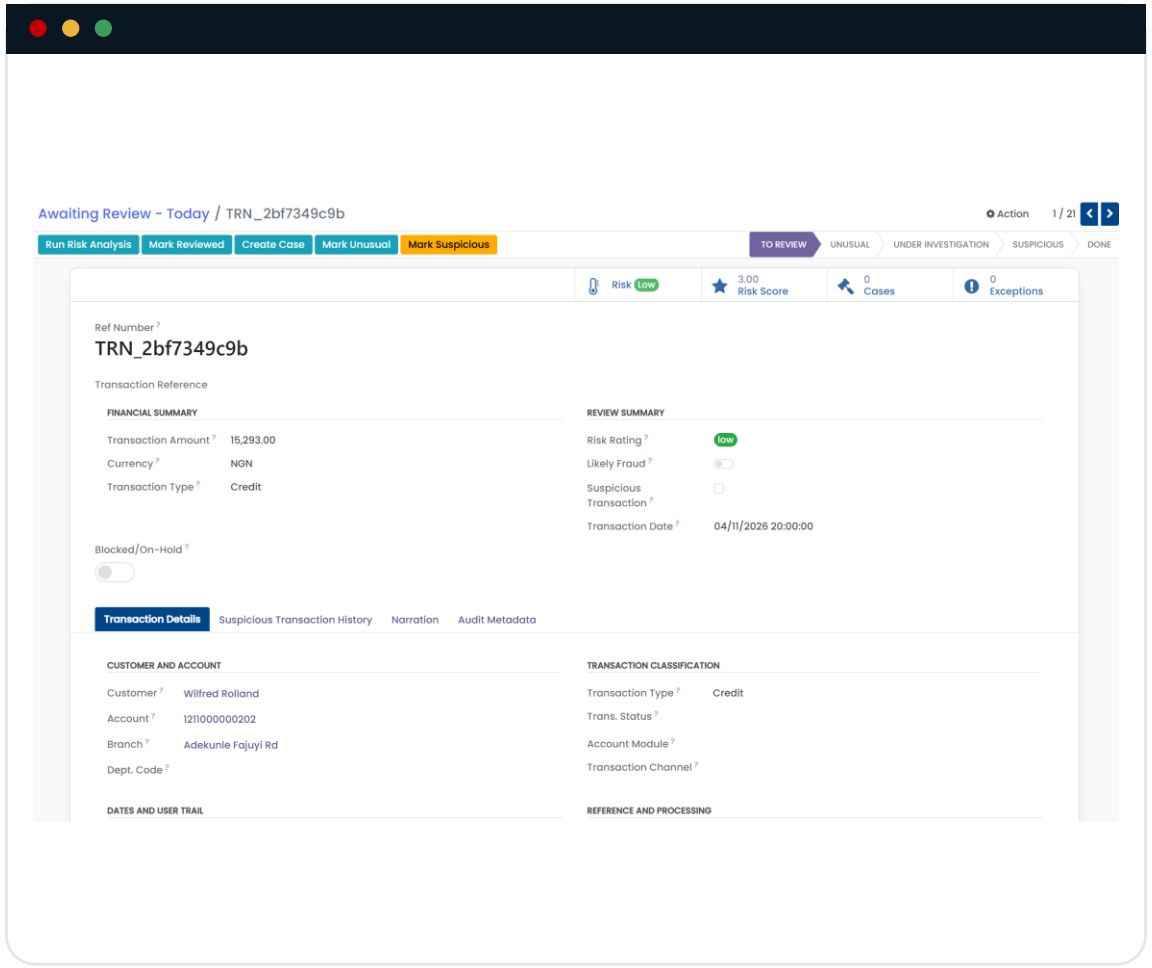

Account Risk Profiling

- **Automated account risk.** Automated risk profiling of every customer account.
- **ML-ready analytics.** Daily updated analytics feed machine-learning fraud detection.
- **Internal accounts too.** Internal account and GL risk profiling.
- **Flexible rules.** Apply risk rules by account or by GL.

Transaction Monitoring

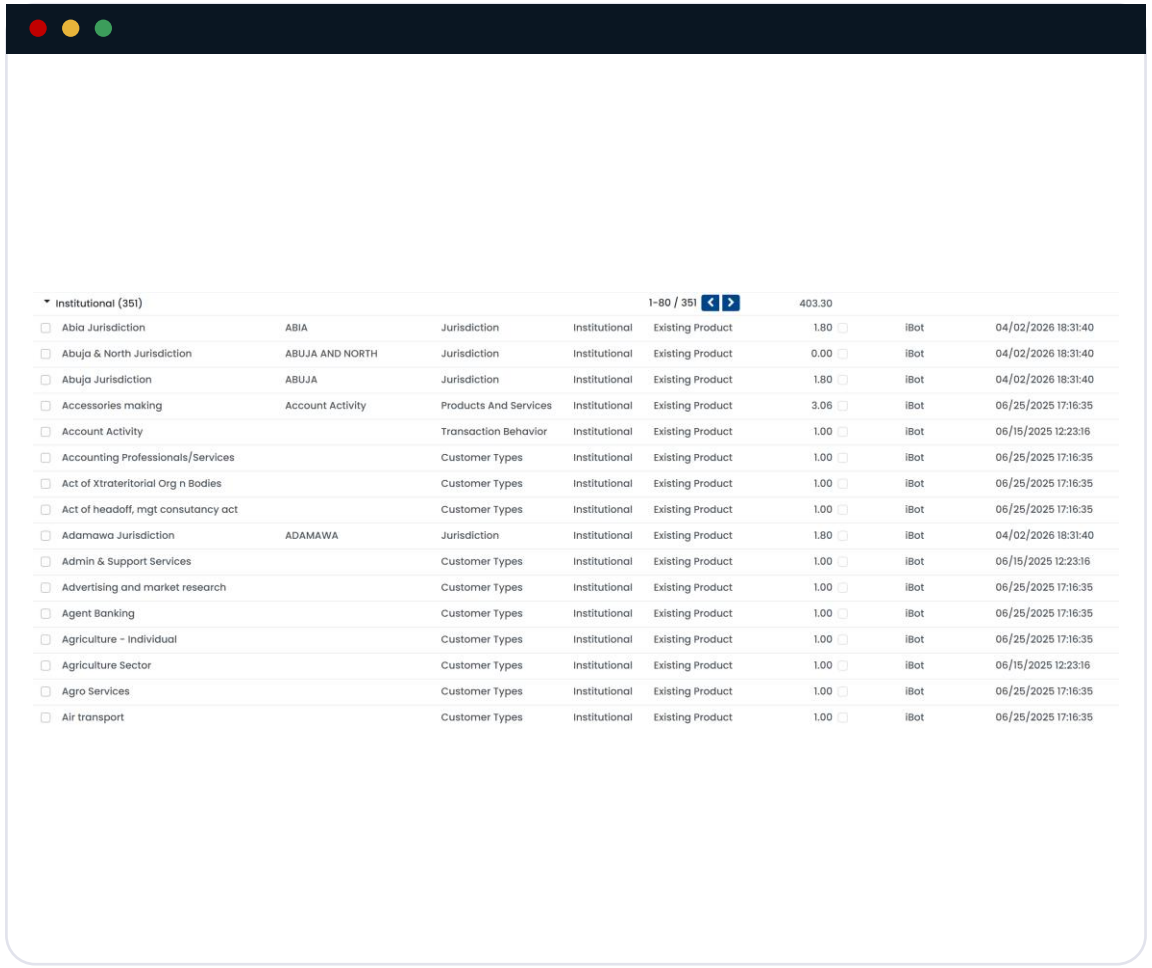

- **Define your rules.** Define transaction rules with ML and AI capabilities.
- **Learn from history.** Use transaction screening history to sharpen detection.
- **Flexible screening.** Run screening automatically or manually and identify risk levels instantly.
- **Built-in review.** Transaction review and call-over workflows included.

RISK FRAMEWORK

Risk Assessment

- **A complete framework.** Develop a comprehensive risk management framework.
- **Clear definitions.** Risk Universe, Risk Subject, Risk Score and Risk Rating, clearly defined.
- **Faster onboarding.** Pre-defined templates simplify the onboarding process.

ENTERPRISE RISK

Financial Crime Risk Assessment

- **One risk position.** Aggregates every risk dimension into a single institutional position.

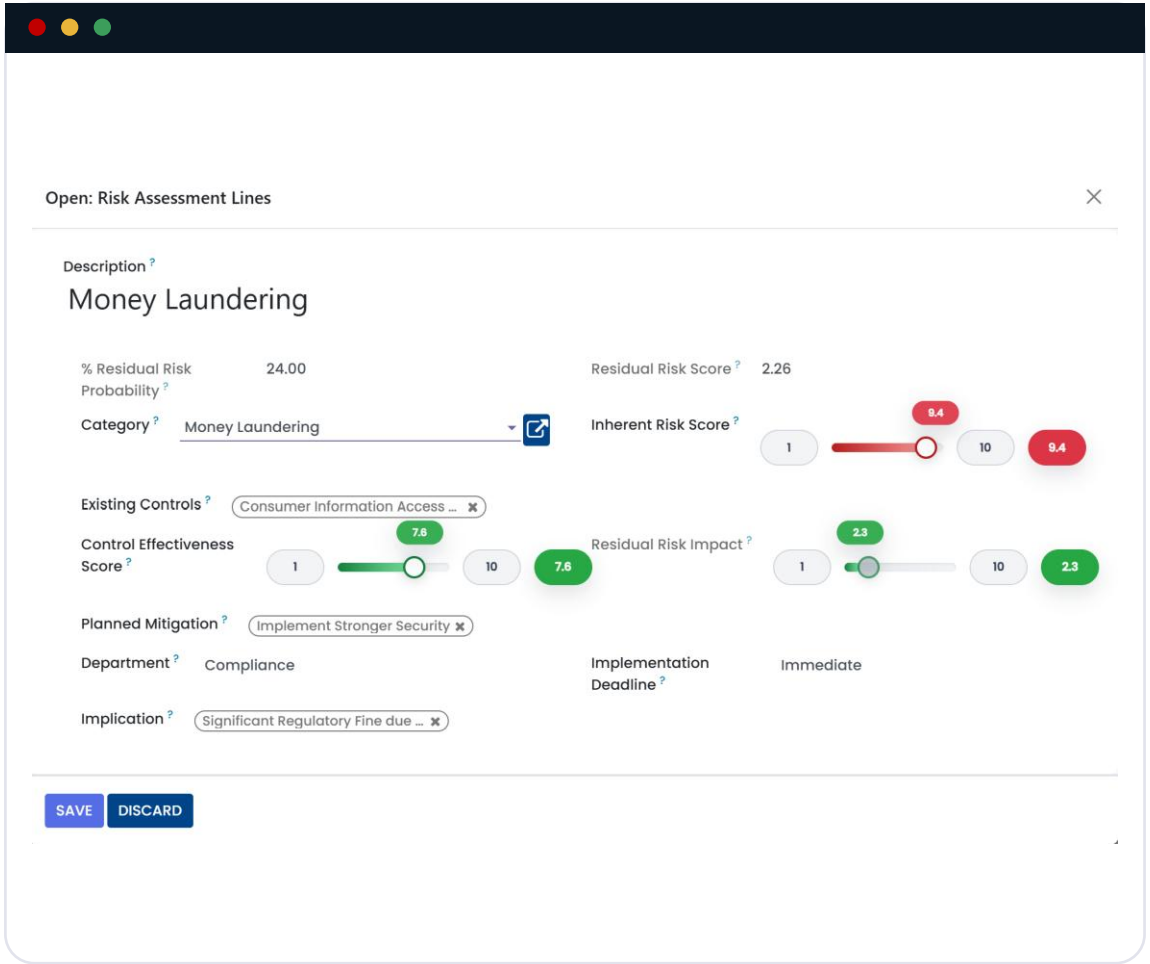

- **Across every relationship.** Run institutional, counterparty, vendor, correspondent and respondent risk assessments.

RISK SCORING

Risk Assessment Calculator

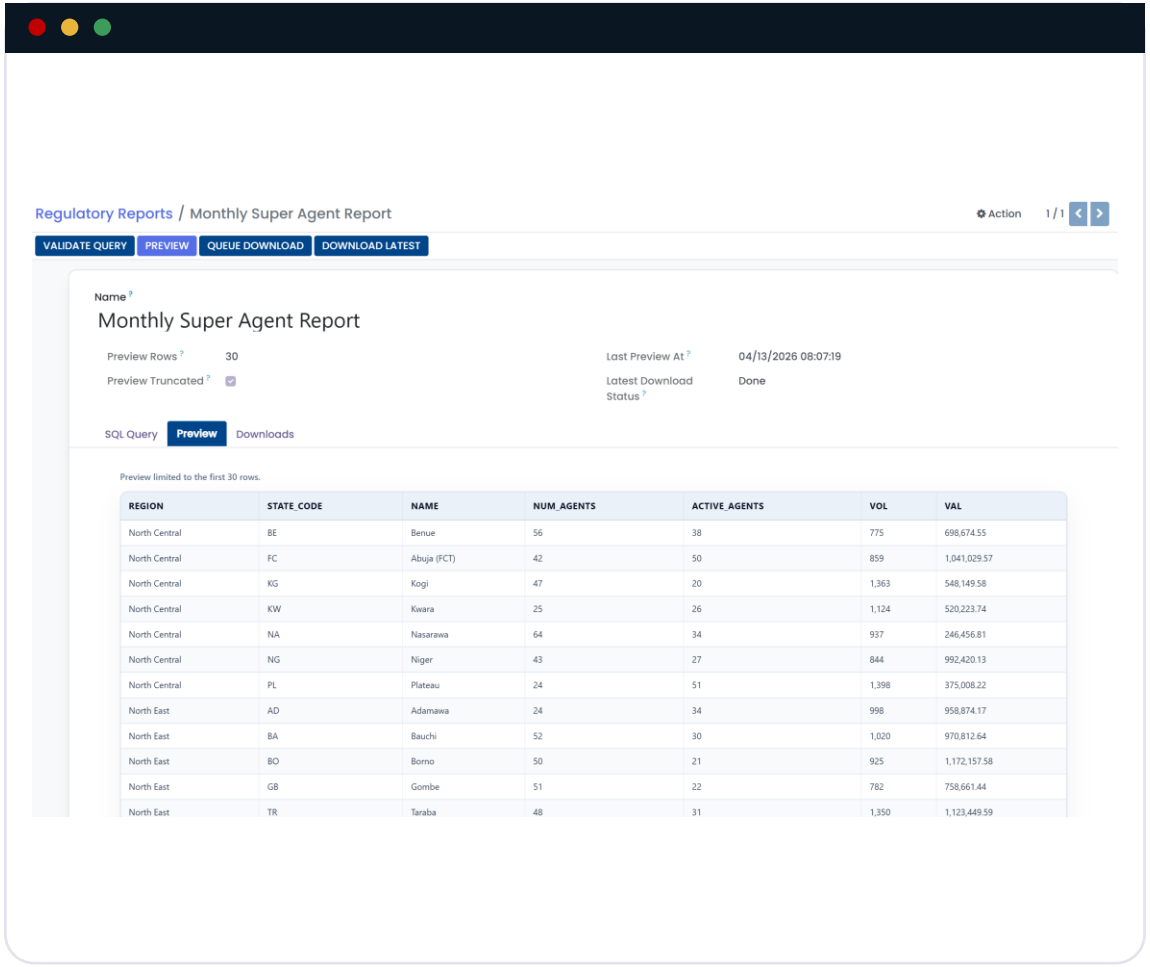

- **Score every subject.** Use the Risk Estimator to define a risk score across every risk subject.
- **Define controls.** Define the controls in place for each risk.
- **Plan mitigation.** Define planned mitigations and track them to completion.

REGULATORY REPORTING

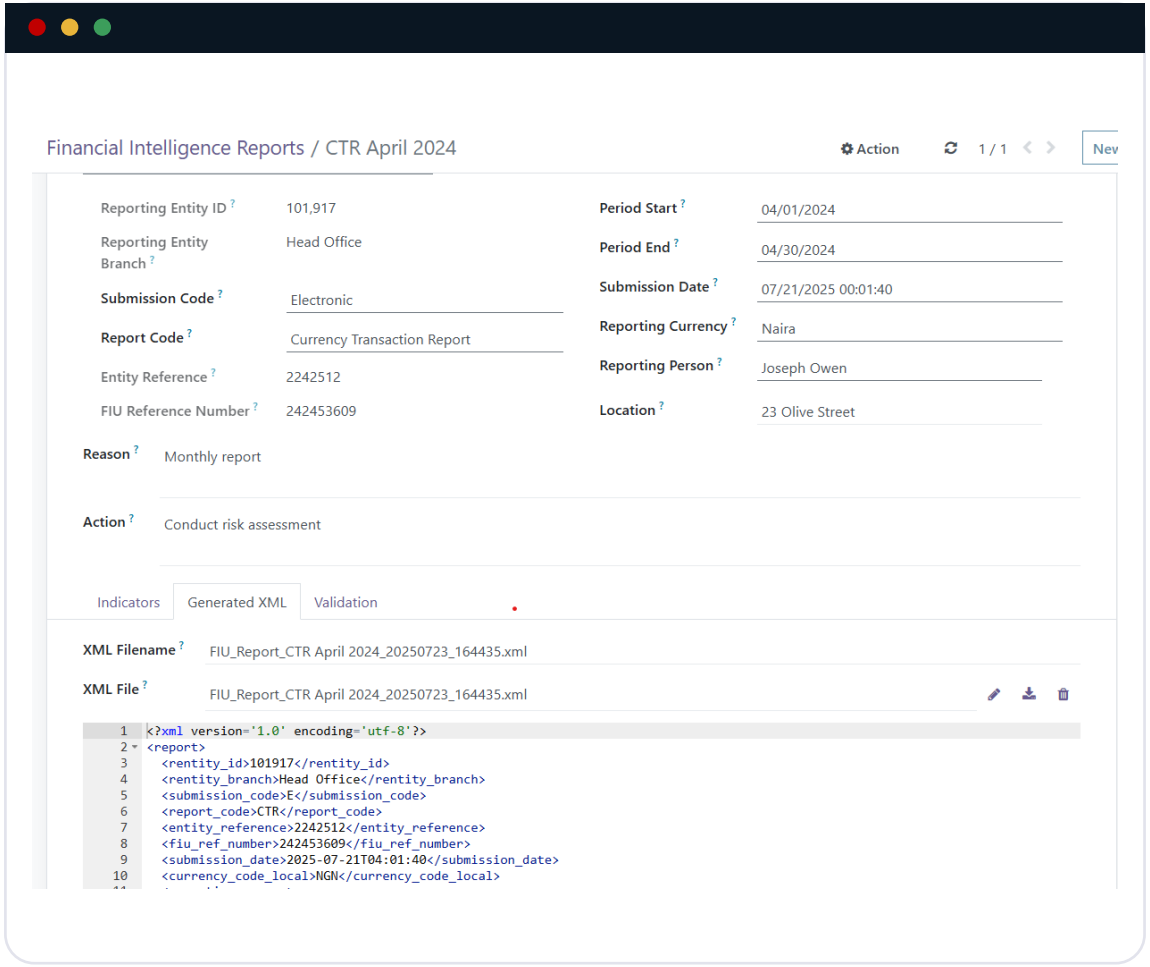

Regulatory Reporting

- **Real-time insight.** Real-time insights and reporting for transaction monitoring.
- **Full report suite.** STR, Currency Transaction Reports (CTR) and Foreign Currency Transaction Reports (FTR).
- **Automated generation.** Automated reporting tools generate reports for internal and external stakeholders.

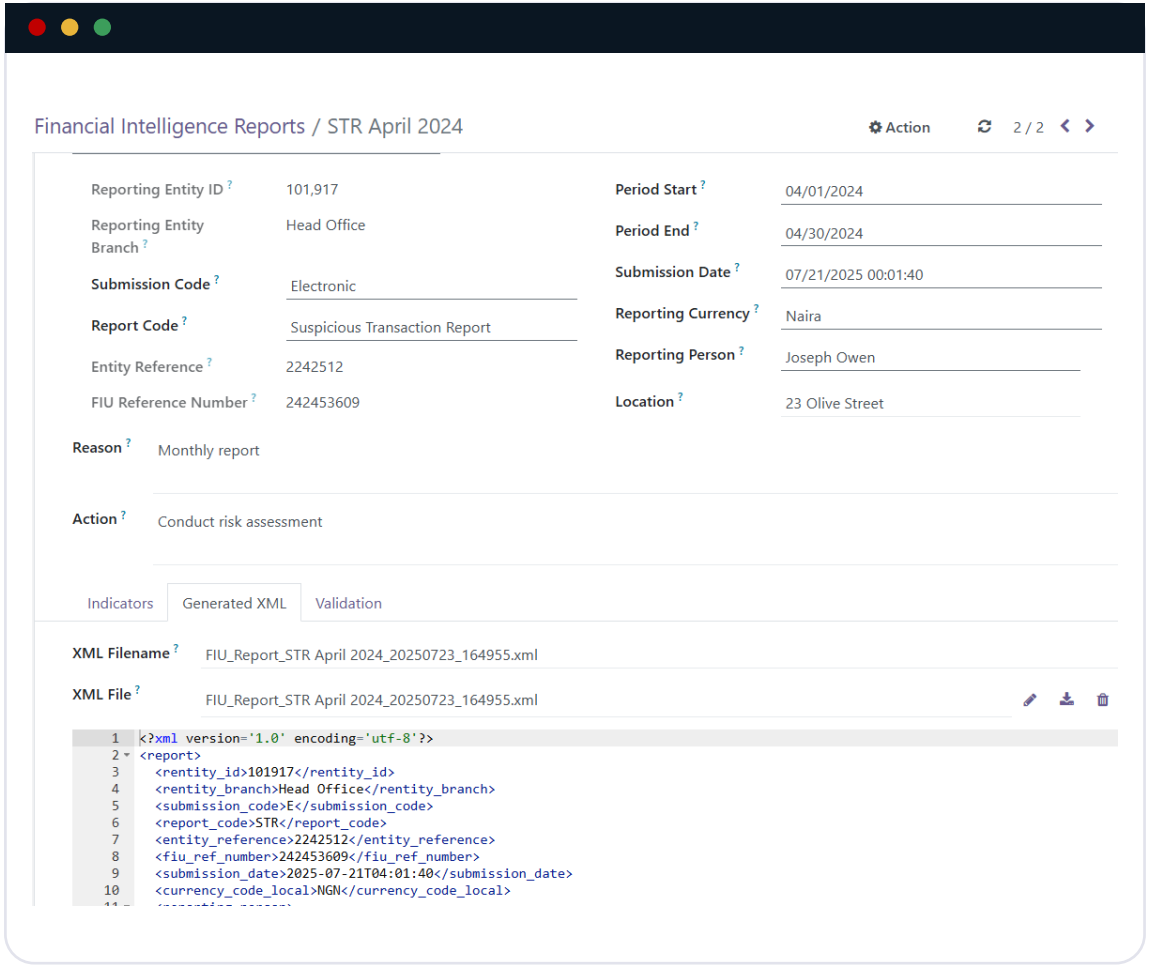

Financial Intelligence Reporting — Currency Transactions

- **Local & foreign currency.** Covers both local and foreign currency transactions.
- **Aligned to NFIU.** FIU reporting aligns with regulatory reporting units such as the NFIU.
- **goAML-ready XML.** XML report generation aligns with the goAML schema.
- **One-click submission.** Automatically submit reports once generated.

Financial Intelligence Reporting — Suspicious Transactions

- **goAML XML generation.** XML report generation aligned with the goAML schema.
- **Built-in validation.** XML validation identifies errors before submission.
- **Case-linked STR rules.** STR rules integrated directly with the Case Management solution.
- **Approval workflow.** A structured approval workflow governs STR submission from Case Management.
- **False positive control.** Manage false positives and false negatives with confidence.

CASE LIFECYCLE

Transaction Review Workflow

1. To Review → **2. Under Investigation** → **3. Pending Approval** → **4. Done**

Branch Compliance Officer

- Unusual transaction flagged
- Needs further investigation

Compliance Officer

- Case created
- Active investigation
- Marked suspicious

Chief Compliance Officer

- Approved by CCO
- Reported to NFIU

Case Closed

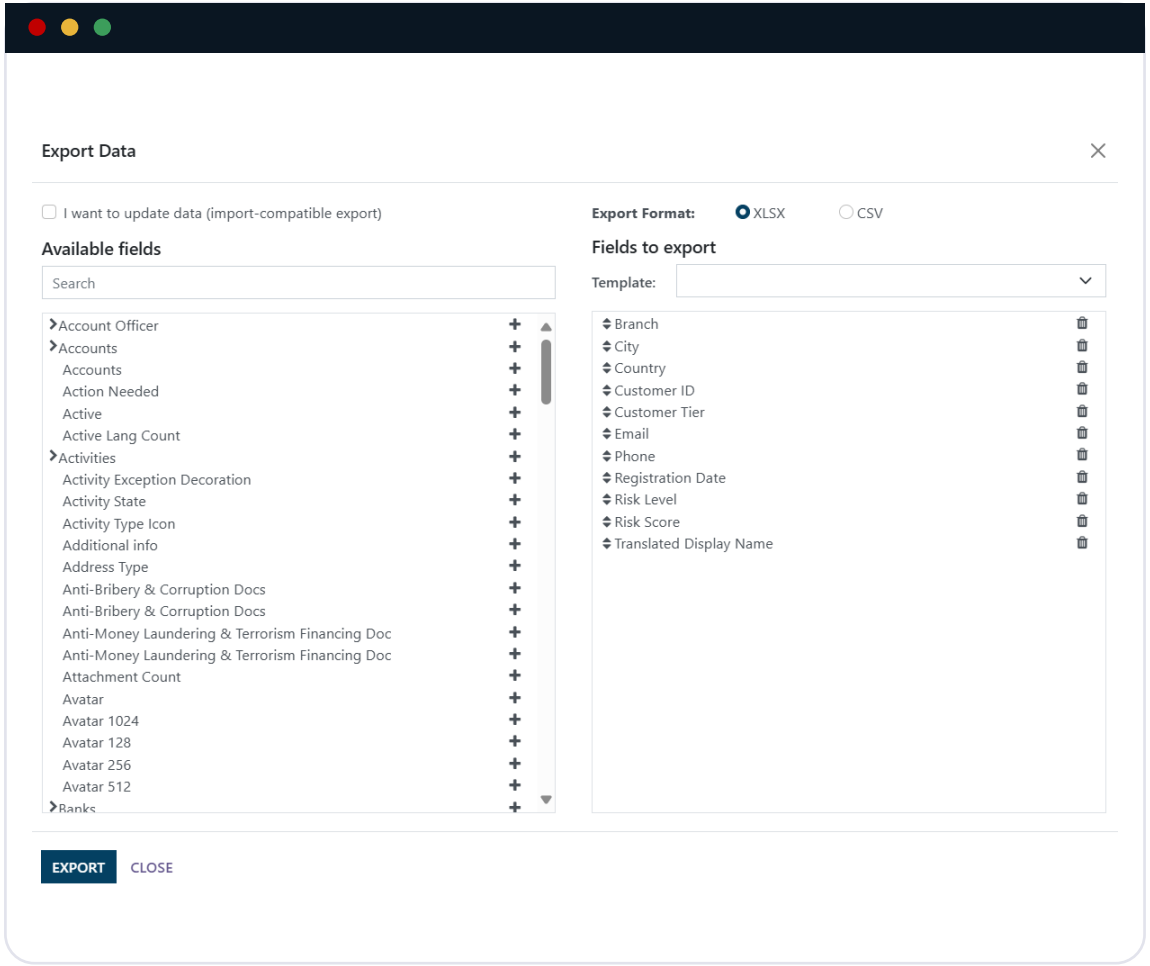

- Not reported if no red flags found
- Case moved to Done

Cases advance automatically as compliance officers act — every step is logged and auditable.

REPORTING TOOLS

Flexible Data Export

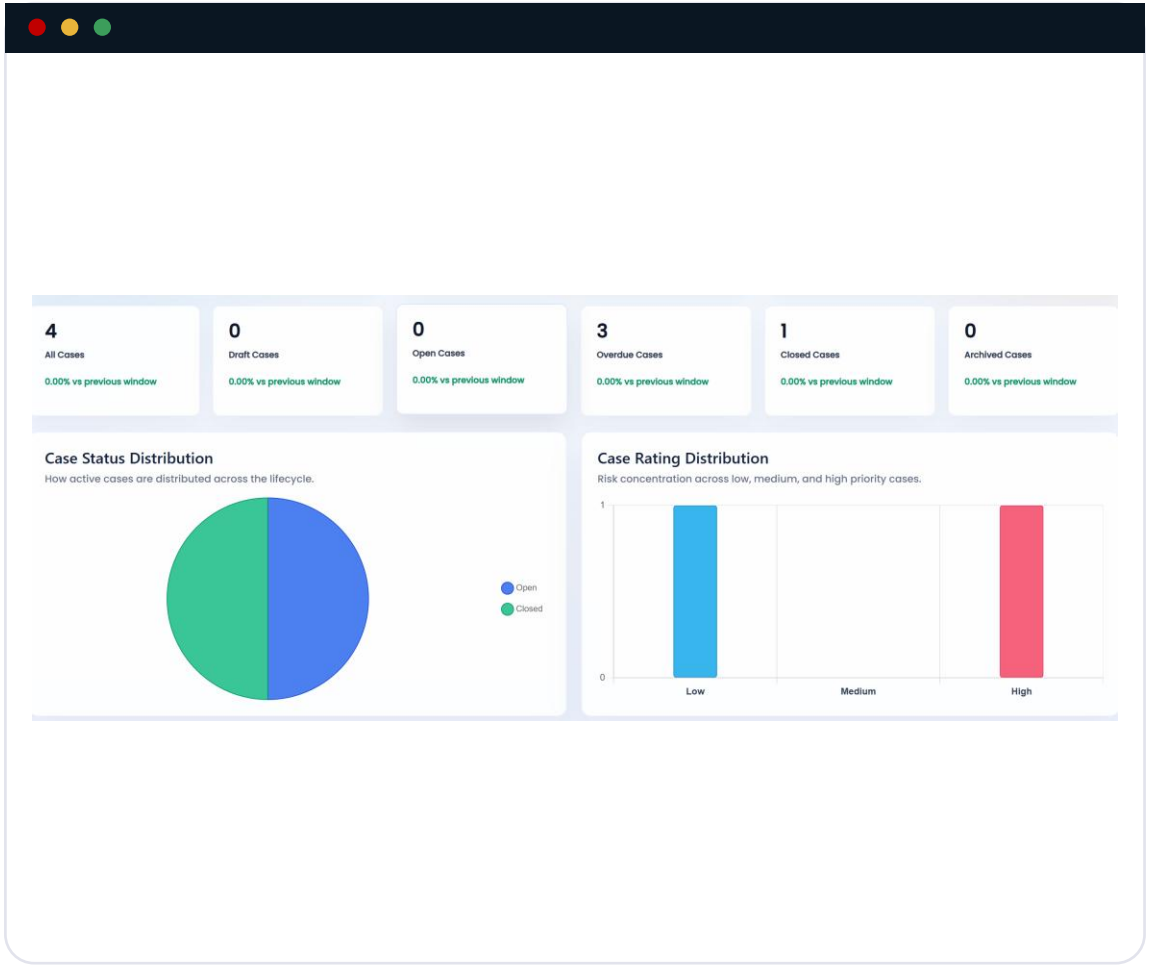

- **Available everywhere.** Available across all reports.
- **Choose your fields.** Select custom fields and save your own templates.
- **Your format.** Export in Excel or CSV.

MANAGEMENT REPORTING

Key Performance Indicators

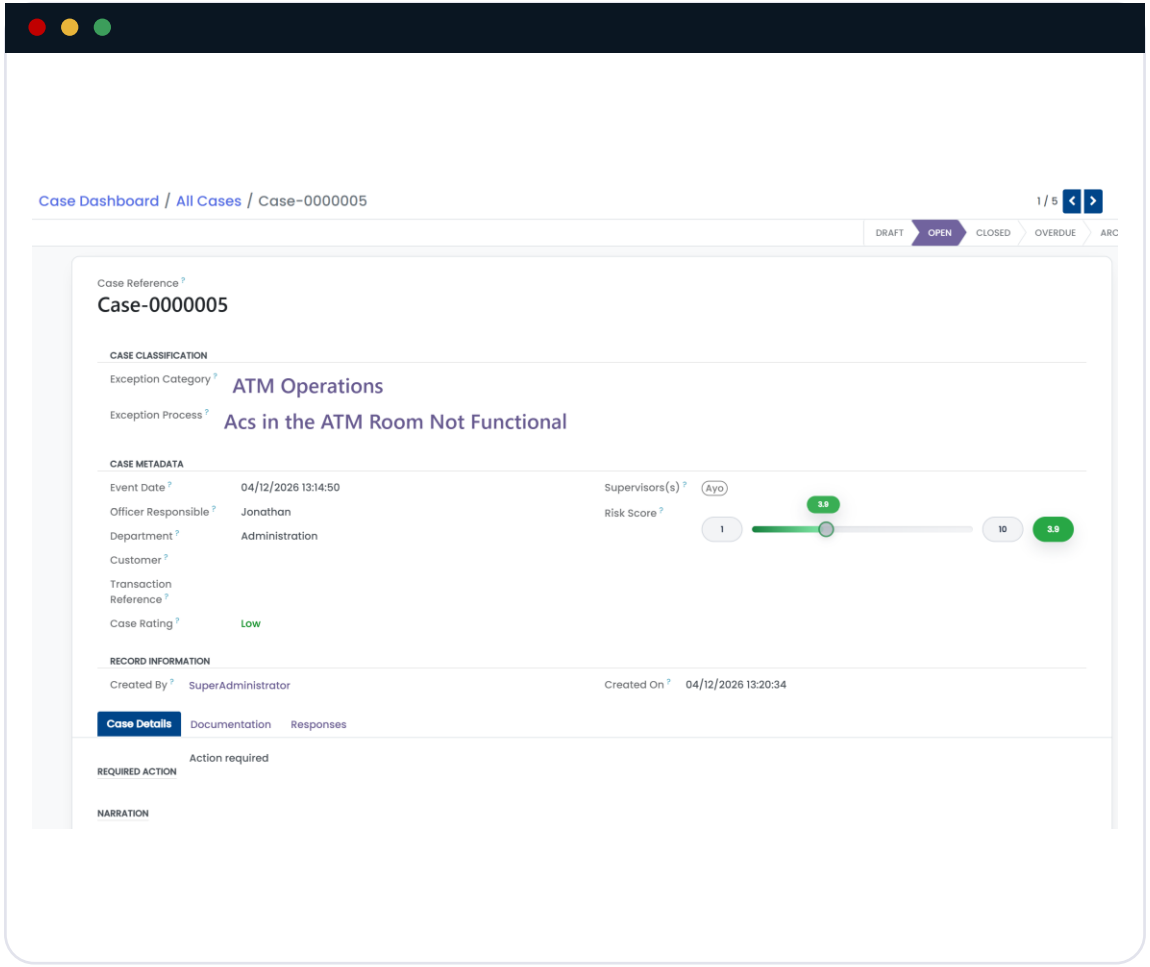

- **Everywhere you need them.** Available across all reports.
- **Filter your way.** Multi-dimensional filters, including date range and more.
- **Grow the dashboard.** Dynamically add new indicators as your needs evolve.
- **Download & share.** Download KPIs for management reporting.

CASE MANAGEMENT

Enterprise Case Management

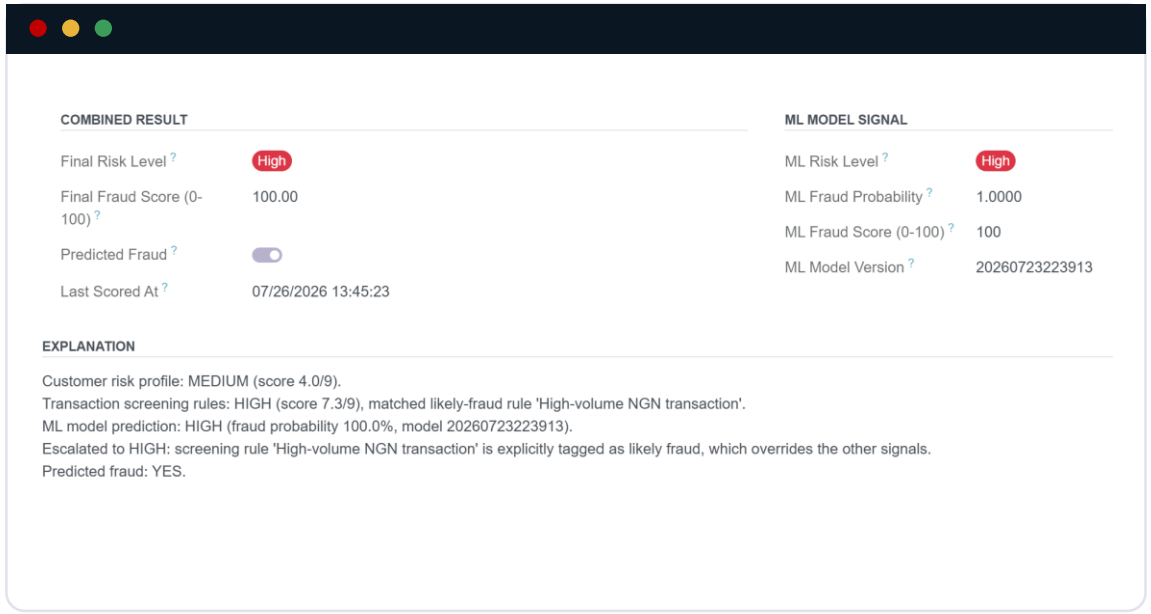

- **Automated case lifecycle.** Automates the creation, assignment and management of cases.
- **Risk-based prioritization.** A risk-based scoring mechanism prioritizes cases by customer risk and alert severity.
- **Connected everywhere.** Integrated across all modules — re-assign cases and trigger alerts.
- **Clear accountability.** Staff provide feedback and escalate to 1st and 2nd line managers and supervisors.

FRAUD DETECTION

Machine-Learning Based Fraud Detection

- **Intelligent tagging.** ML-based detection tags likely fraudulent transactions.
- **Your choice of model.** Choose supervised or unsupervised model approaches.
- **Always learning.** Continuous, automated training and re-training as transaction history evolves.
- **Flag & act.** Flag suspicious and likely fraudulent transactions automatically.
- **API-first.** RESTful API-based fraud detection integrates with your existing systems.

A Multi-Layered Approach

Layer 1

Customer Risk Assessment

- Risk rating
- Risk score
- Change data capture

Layer 2

Transaction Screening Rules

- Exceptions found
- Case history

Layer 3

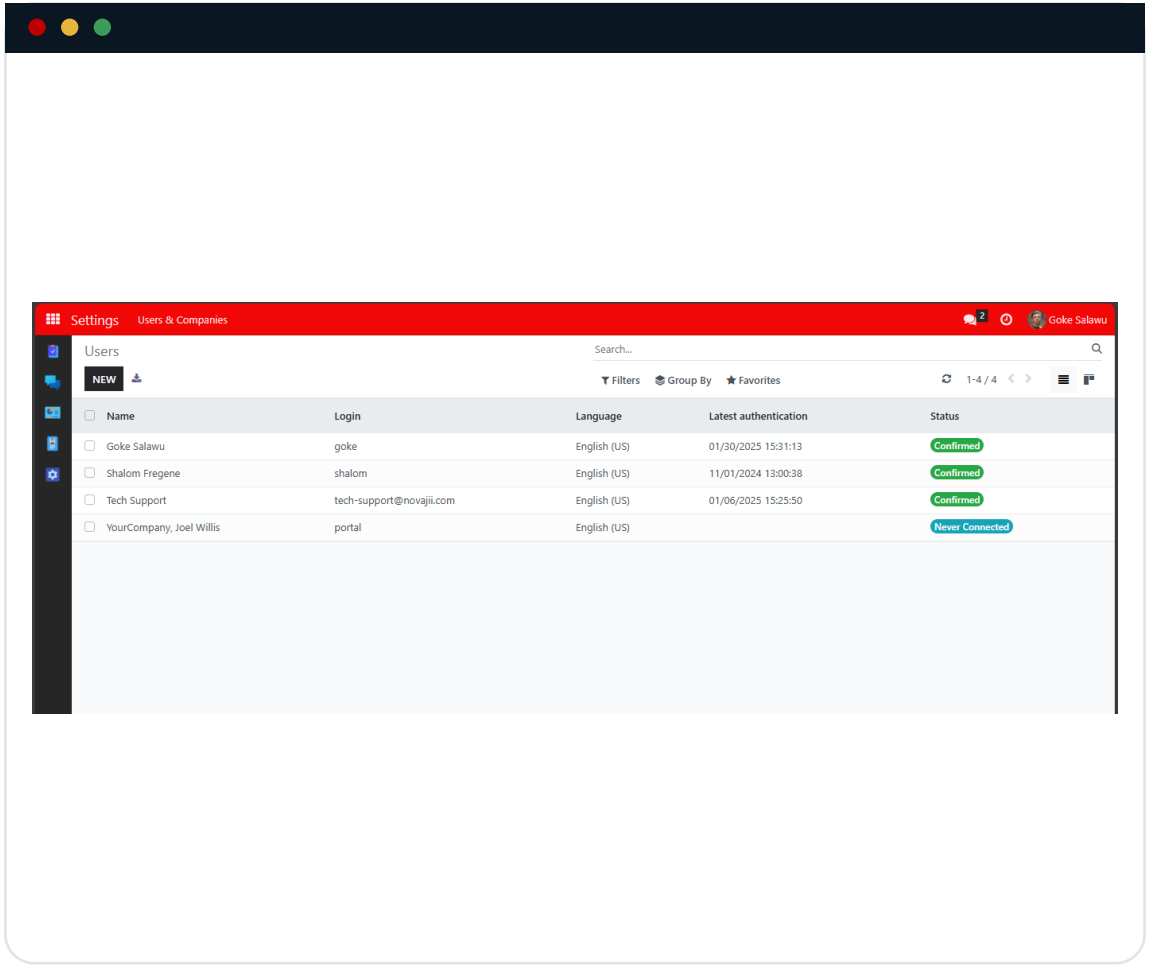

Model Prediction

- Supervised learning
- Unsupervised learning

SECURITY

Security & Privileged User Access Management

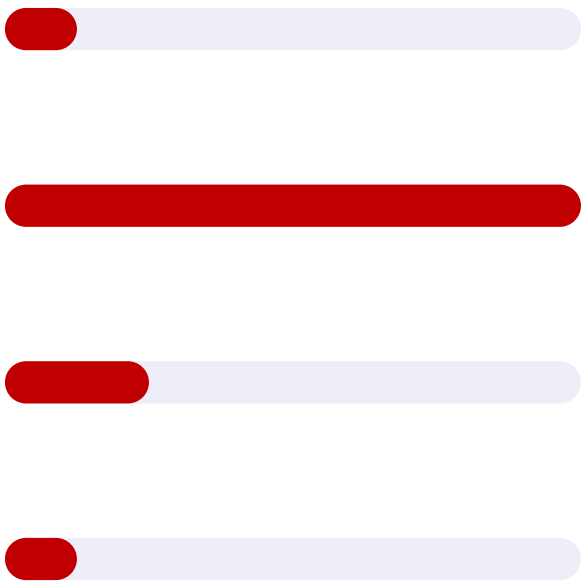

- **Encrypted in transit.** Transport Layer Security (TLS) for SSL, protecting data in motion.
- **Strong authentication.** Two-factor authentication and Active Directory / Single Sign-On (SSO).
- **Access by role, module & branch.** Grant read, write and delete access by user role, module and branch.
- **Full accountability.** Full user activity tracking and logging, including read/write/delete audit logs.

GETTING STARTED

Implementation Timeline

1	Requirements Gathering & Technical Assessment	1 week
2	Development, Customization & Integration	8 weeks
3	User Acceptance Testing (UAT)	2 weeks
4	Training & Go-Live	1 week

Total implementation time **12 weeks**

MATRICS

One Platform. Every Compliance Capability.

- Financial Crime Risk Assessment
- Due Diligence / KYC
- Identity Verification
- Enhanced Due Diligence
- Alert Monitoring
- Transaction Monitoring
- Case Management
- Regulatory Reporting
- Financial Intelligence
- Sanction Screening
- Adverse Media Screening
